Objective

To leverage my 5.8 years of experience as a Full-Stack Developer specializing in .NET, React, and Azure to design, develop, and deliver scalable, high-performance solutions. I aim to contribute to innovative projects, optimize processes, and mentor teams while continuously enhancing my technical expertise and driving organizational success.

Professional Summary

- **Technically skilled IT professional** with 5.8 years of experience, currently working as a Senior Software Engineer at Virtusa Consulting Services Private Limited, Chennai.
- Adequate experience and knowledge in **Microsoft .NET Technologies** and **SQL Server**.
- Proficient in developing Web Applications using **C#, React, and Visual Studio 2022**.
- Well-versed in all phases of **SDLC** and **Agile Development Models**.
- Skilled in collaborating with Clients, Developers, Business Analysts, and Management for requirement analysis and project delivery.
- Proven ability to create Proof of Concepts (POCs) using scalable technologies like **Kafka** and **Azure Functions**.
- Experience in **unit testing, integration testing**, and implementing best practices for robust software delivery.

Skills

- **Programming & Frameworks:** C# , .Net6, .Net 8 , ASP.Net MVC, Multithreading, OOPS, ADO.NET, LINQ
- **Frontend:** HTML5 + CSS3, JavaScript, jQuery, React
- **Database:** SQL Server (2012/14/17), Stored procedure
- **Tools & Platforms:** Visual studio 2022, Azure Function, Kafka, Api Gateway
- **Development Practices:** SDLC, Agile, Testing (Unit, Integration)

Experience

Virtusa Consulting Service Private Limited   June 2019 - Present
Senior Software Engineer

- Played an active role in all phases of the SDLC, from analysis to rollout.
- Conducted walkthrough sessions, internal status meetings, and requirement discussions.
- Translated business requirements into functional and technical specifications.
- Developed Web Applications and scalable services using .**NET 6, React, and Kafka**.
- Performed end-to-end **unit testing** and **integration testing**.
- Created and optimized workflows and approval systems for applications.

Projects

- **E-Fast Web Integration**
  The application is used to generate configuration file based on the input parameters which is used to monitor the Aircraft engine. Frequently, DMZ(De Militarized zone) will get the monitored files which helps to track the engine health.
- **Failure Malfunction Report - CMS**
  FMR-CMS is used to create the aircraft failure report and to gets the multiple levels of approvals through emails.
- **FMECA - CMS**
  FMECA-CMS is used to create the workflow for engine. It helps to import/export the aircraft data from excel file to application. Have access roles to approve and reject the workflow.

Responsibilities

- Contributed to all stages of the software development lifecycle.
- Conducted requirement analysis, estimation, and project documentation.
- Designed and implemented solutions for complex business logic.
- Delivered projects with quality assurance through extensive testing.

Achievements & Awards

- **5 Years Long Time Service Award** – Q1FY25
- **SBU Pioneer Award** – Q1FY24
- **PIRL Awards** – Q3FY22, Q1FY22
